

Question Paper Pattern EVS-I

Type of questions	Total-35 marks
Q1) Attempt any EIGHT of the following:	[8 × 1 = 8]
Q.2) Attempt any FOUR of the following:	[4 × 2 = 8]
Q.3) Attempt any TWO of the following:	[2 × 4 = 8]
Q4) Attempt any TWO of the following:	[2 × 4 = 8]
Q5) Attempt any ONE of the following:	[1 × 3 = 3]

Question Bank:

Chapter 1: Humans and the Environment

Q1. Answer the following: (1 Mark each)

- Name the human ancestor who discovered fire.
- What were the key features of the hunter-gatherer lifestyle?
- Explain the significance of fire mastery for early humans.
- How did the origin of agriculture affect the environment?
- Name two major environmental impacts of ancient civilizations.
- What role did the Industrial Revolution play in shaping environmental exploitation?
- Define "Anthropocentric perspective" in environmental thought.
- What is "eco-centrism"?
- Name one important outcome of the UN Conference on Human Environment 1972.
- Who was responsible for the "Limits to Growth" report, and what was its key message?

Q2. Answer the following (2 Mark each)

- Discuss how the transition from hunter-gatherer societies to agriculture impacted human-environment interactions.
- Briefly explain the environmental challenges faced by city-states in ancient civilizations.
- What was the environmental significance of the Industrial Revolution?
- Describe the contributions of the World Commission on Environment and Development.
- Explain the concept of "sustainable development" and its importance for global environmental policy.

Q3. Answer the following (4 Mark each)

- a) Discuss the environmental impact of population growth and natural resource exploitation in the modern era.
- b) Compare and contrast anthropocentric and eco-centric perspectives on environmentalism.
- c) What were the major outcomes of the Rio Summit on the environment, and how did it shape international efforts?
- d) Compare and discuss the humans from the pre-historic and modern day.

Q4. Answer the following (4 Mark each)

- a) Explain how great ancient civilizations (like the Egyptians, Mesopotamians, or Greeks) influenced their environment.
- b) Analyse the environmental changes brought about by the Middle Ages and Renaissance periods.
- c) What role did the Club of Rome play in shaping modern environmental discourse?

Q5. Answer the following (3 Mark each)

- a) Critically evaluate the impact of the Industrial Revolution on modern-day environmental challenges.
- b) How did the concept of sustainable development emerge, and why is it relevant today?

Chapter 2: Natural Resources and Sustainable Development

Q1. Answer of the following:(1 Mark each)

- a) Define a natural resource.
- b) What is the difference between biotic and abiotic resources?
- c) Name two examples of renewable resources.
- d) What are freshwater resources?
- e) List two challenges related to wildlife conservation.
- f) What is water scarcity?
- g) Name two important minerals commonly used in industry.

- h) What are conventional energy sources?
 - i) What is the main goal of the Sustainable Development Goals (SDGs)?
-

Q2. Answer of the following (2 Mark each)

- a) Discuss the environmental impact of over-exploitation of freshwater resources.
 - b) What are the key environmental challenges related to soil degradation?
 - c) Compare the environmental impact of coal and solar energy.
 - d) Describe the role of microbes as a natural resource.
 - e) Explain the major causes of water conflicts between regions or nations.
-

Q3. Answer of the following (4 Mark each)

- a) Discuss the classification of energy resources into renewable and non-renewable types, providing examples for each.
 - b) Explain how mineral extraction affects the environment and what can be done to minimize its impact.
 - c) What are the major issues and challenges associated with achieving water sustainability globally?
-

Q4. Answer of the following: (4 Mark each)

- a) Analyze the importance of wetlands as a biotic resource and the threats they face.
 - b) Explain the significance of Sustainable Development Goals (SDGs) in promoting environmental sustainability.
 - c) Discuss the implications of using nuclear energy in the context of environmental sustainability and risks.
-

Q5 Answer of the following: (3 Mark each)

- a) Critically assess the environmental impact of conventional versus non-conventional energy sources.
- b) What strategies are needed to achieve the Sustainable Development Goals (SDGs) in relation to natural resource management?

Chapter 3: Environmental Issues: Local, Regional and Global

Q1 Answer of the following: (1 Mark each)

- a) Define the concept of micro-scale environmental phenomena.
 - b) What is synoptic scale in environmental science?
 - c) Name two types of pollution and briefly explain their impact on the environment.
 - d) What is transboundary air pollution?
 - e) Define acid rain and its impact on ecosystems.
 - f) What is desertification, and how does it affect the environment?
 - g) Name two causes of biodiversity loss.
 - h) What is the significance of the ozone layer for Earth's climate?
 - i) Define urbanization and its environmental impact.
-

Q2. Answer of the following: (2 Mark each)

- a) Discuss the difference between local, regional, and global environmental phenomena.
 - b) Explain the environmental consequences of municipal solid waste.
 - c) What are the main causes of deforestation, and how does it affect the environment?
 - d) Describe the process of smog formation and its effects on human health.
 - e) What are the main factors responsible for ozone layer depletion?
-

Q3. Answer of the following: (4 Mark each)

- a) Discuss the environmental impact of land degradation and desertification.
 - b) How does climate change contribute to biodiversity loss?
 - c) Analyze the environmental impact of noise and hazardous waste pollution.
-

Q4. Answer of the following: (4 Mark each)

- a) Describe the global effects of ozone layer depletion and its link to climate change.
 - b) Explain the environmental consequences of deforestation and urbanization on land use and land cover.
 - c) What are the main challenges in addressing transboundary air pollution?
-

Q5. Answer of the following: (3 Mark each)

- a) Critically assess the relationship between climate change and pollution on a global scale.
- b) Discuss the key strategies required to mitigate land use change and biodiversity loss.

Chapter 4: Conservation of Biodiversity and Ecosystems

Q1. Answer of the following: (1 Mark each)

- a) Define biodiversity as a natural resource.
 - b) What are biodiversity hotspots? Give one example.
 - c) Name two levels of biodiversity.
 - d) What are ecosystem services?
 - e) What is meant by in-situ conservation?
 - f) List two major threats to biodiversity.
 - g) Name one major forest ecosystem in India and describe its basic characteristics.
 - h) What are invasive species and how do they impact ecosystems?
 - i) What role does traditional knowledge play in biodiversity conservation?
-

Q2. Answer of the following: (2 Mark each)

- a) Explain the difference between species diversity and ecosystem diversity.
 - b) Discuss the environmental significance of wetlands in India.
 - c) How do land use and land cover changes threaten biodiversity?
 - d) What are the major ecosystem services provided by grasslands?
 - e) Describe the role of community-based conservation in biodiversity protection.
-

Q3. Answer of the following: (4 Mark each)

- a) Discuss the different threat categories for species and ecosystems, with examples.
 - b) Explain the major causes of biodiversity loss due to commercial exploitation of species.
 - c) Analyze the environmental and social impacts of climate change on biodiversity.
-

Q4. Answer of the following: (4 Mark each)

- a) Discuss the key features of in-situ and ex-situ conservation approaches with examples.
 - b) Explain the role of National and International instruments for biodiversity conservation.
 - c) How can gender issues influence conservation policies?
-

Q5. Answer of the following: (3 Mark each)

- a) Assess the significance of ecosystem services for human well-being.
- b) What are the major conservation challenges faced by coastal and marine ecosystems in India?
