Software Engineering

Question Bank

- **1 and 2 Marks Questions**

Chapter-1

1. Define software.
2. Why are software myths harmful?
3. List any two umbrella activities of software process.
4. State the evolving role of software in modern systems.
5. What is process adaptation?

Chapter-2

6. What is reverse engineering?
7. List the advantages of Concurrent Model.
8. Define generic process model and list the phases of generic process model.
9. What is unified process?
10. List the advantages of waterfall model.
11. Define prescriptive process model.

Chapter-3

12. What is meant by human factors in agile development?
13. Explain Dynamic System Development Model with neat diagram.
14. Name any two key XP activities.
15. Define agility.
16. What are the advantages of Scrum?
17. List any two agile principles.

Chapter-4

18. State the purpose of use case diagram.
19. Write the symbols of activity diagram.
20. What is elicitation?
21. What is negotiation?
22. What is requirement validation?

Chapter-5

23. Write any two testing strategies?
24. What is black box testing?
25. What is white box testing.
26. Define system testing.
27. Define unit testing.
28. List the phases of STLC.

- **3,4 and 5 Marks Questions**

Chapter-1

1. Describe any four process framework activities.
2. What are the umbrella activities? Explain any 4 in detail
3. Discuss process adaptation and explain how it improves software quality.

Chapter-2

4. What is unified process model and Explain its phases in detail.
5. Explain the incremental process model with its advantages.
6. Explain waterfall model with neat diagram.
7. Write a short note on evolutionary process models.

Chapter-3

8. Define terms: Agile method and Agile process
9. Explain the Adaptive Software Development (ASD) in detail.
10. Explain phases of XP process with suitable diagram
11. Explain scrum in detail.

Chapter-4

12. Draw UML use case diagram for online shopping
13. Draw UML class diagram for railway reservation system.
14. Discuss the Software Requirement Specification (SRS) and its characteristics
15. Explain different approaches for requirements elicitation.
16. Explain the UML class diagram for hotel booking.

Chapter-5

17. Describe various software testing techniques.
18. Explain the different levels of testing in detail.
19. Explain the concept and importance of software testing
20. Differentiate between black box testing and white box testing.
